DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Richard.

Claim 1 calls for a landscaping tool of the type having a pair of handles and a cutting end. This would appear to be definite and include shears and nippers. Richard shows such a tool. The improvement comprises a U-shaped hook (d of Richard), associated with one of the handles. There appears to be little material difference between pruning and loping shears.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walsh in view of Wehr. Walsh shows the claimed landscaping tool with handles. A hook is also shown. The hook is not associated with a handle however. Wehr shows a handle that supports a tool with a cutter at one end and a hook at the other end. This is an obvious equivalent design for hook and cutter being at the same end. Thus it would

have been obvious to place the hook of Walsh on one of the handles. It is felt that the exact placement thereof (ie. at the end of the handle) would be obvious a showing of criticality. Similarly the securing would be obviously be any of several equivalents such as detents or clamps.

Allowable Subject Matter

Claims 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. None of the references suggests hooks that are flexible enough to maneuver through foliage.

Claims 10-13 are allowed. None of the references shows or suggests the specific structure of the U-shaped end as set forth in claim 10.
